

HEATSTROKE PREVENTION

WHAT TO KNOW:

- NEVER leave your child alone in a car. Even with a window cracked, it is possible for them to become overheated.
- Lock the car when you're not using it, and make sure all keys and remote entry fobs are out of children's sight and reach.
- Keep rear fold-down seats closed, when not in use.
- If your child does get locked in the car, call 911 immediately.

SEAT REMINDERS:

- Make it a habit to always check the back seat before you lock your car.
- Remind yourself to check the back seat by putting something that you will need, such as your purse or cell phone, next to your child, especially on days when you are breaking routine.
- Create a plan with your child's daycare or school, so they will contact you if your child is late in being dropped off.

TALKING TO CHILDREN:

- Teach kids that cars and car trunks are not safe places to play.
- Show older kids how to locate and use the glow-in-the-dark emergency trunk release, so that they know what to do in case they do become trapped. Cars made after September 1, 2001 will have these.

DOWNLOAD THE MAKE SAFE HAPPEN APP

Developed in partnership with the safety experts at Nationwide Children's Hospital, the app helps you make your home safer. Get room-by-room safety checklists, link to recommended products, and set reminders.
